Water Treatment Products and US based AP Tech co-operation.

APTech Group, specialists in providing solid water chemistry for 20 years.

WTP and AP Tech solid water treatment chemistry specialists are pleased to announce business co-operation for the supply of solid chemicals and dissolvers in to the UK and EU markets.

WTP have supplied liquid water treatment chemistry for 21 years and working with AP Tech we will be able to offer their established range of solid water treatment chemistry to all our UK customers.

Fast and prompt delivery and UK based stock holding and distribution.

Steve Jones, General Manager, WTP said "We are pleased to be working with AP Tech and look forward to offering a comprehensive product range."

Water Treatment Products' Brexit strategy for 2021 will encompass relationships with our customers and suppliers. We ask our customers to look at stock levels of water treatment chemicals on their sites. For example, keeping a few extra drums of treatment chemicals in the customer's plant room. This will ensure extra supply, on site, at the point of use; and prevent the risk of running out of products post Brexit. We consider 6 weeks' supply to be a reasonable precaution.

We recommend you look at stock levels now. Christmas, Covid-19 and Brexit could have a serious impact on supplies and if stock levels are neglected until the last minute it could spell further supply issues.

Stock Holding

WTP is committed to always holding sufficient stock to meet customer expectations on turnaround times.

Warehousing facilities of 70,000 sq ft for packaging, dry goods and raw materials enables WTP to hold stock on our site. Customers benefit from stock of your fast-moving chemicals, dispatch and collection, and access to unique solutions.

WTP Test Kit Videos

'Test Kits Video' page is available to view on the WTP website. Here you'll find a range of our Test Kit Instructional Videos with step by step instructions; to view prior to purchase.

Biocidal Products Regulation (BPR) and BREXIT

Water Treatment Products are closely monitoring the guidance issued by the HSE and latest news (to date) as follows; From 1 January 2021, Great Britain (England, Scotland and Wales) will put in place a regulatory framework for biocidal products. It will reflect the current EU framework (EU BPR), but they will operate independently of each other.

ARTICLE 95 LIST

A Great Britain version of the EU list of approved active substance suppliers (the 'Article 95' list) will be established. The list will mirror the EU list at the point the transition period ends and will operate in the same way.

WTP are committed to the objectives of BPR and working closely with our suppliers to ensure our continued compliance.

Sanosil Disinfectants

WTP are the sole distributor for Sanosil® in the UK

Made in Britain

Buy British goods and support UK Company's.
