

Delivery of Water Treatment Products during the Olympics 2012

Water Treatment Products has received notification that it is anticipated that there will be massive disruption to the greater London area and some disruption during events in other Olympic locations such as Manchester, Cardiff, Glasgow and Weymouth; along with events such as the national torch-relay prior to the Games.

Much of the focus will be on the Olympic Route Network (ORN) which will be 'activated' on the 25th July and will be in force until 15th August. Following this a limited version will also be in place for the Paralympic Games from 29th August to 14th September.

Restrictions will be rigorously enforced, in particular around parking and unauthorized stopping near to the Olympic event locations. Fines are also being increased significantly. Priority will only be given to facilitating the travel of Games officials, participants and dignitaries along with essential services.

We kindly request that your company considers the receipt of deliveries in advance of the Games commencing and prior to the restrictions coming into force to ensure availability of water treatment products.

Should you wish to discuss your requirements further please do not hesitate to contact us.
