

Merry Christmas and a Happy New Year

from all at
Water Treatment Products Ltd

We would like to thank you for your custom and look forward to working with you in 2017.

BPR - Biocidal Products Regulations

Water Treatment Products only uses biocidal active substances which are supported for review in the appropriate product types under the BPR review program and is committed to work with biocidal active suppliers and consortia that meet BPR criteria. The Biocides that you buy from WTP will pass through the BPR in a phased manner from now until 2023.

As the relevant biocide you purchase goes into the authorisation process you will receive a 'Letter of Intent' which you will need to sign and return promptly. Reminder Letters of Intent for the first product group are due back on 9th January 2107.

Chlorine Dioxide Tablets

WTP Chlorine Dioxide Tablets are manufactured with BPR compliant materials. Developed specifically as a safe, highly effective anti-microbiological control. The tablets only release chlorine dioxide when in contact with water. WTP Chlorine Dioxide Tablets are available as 8g and 25g tablets. Chlorine Dioxide Test Strips are available to determine correct levels in the system.

Build Cert

WTP CW55M Closed System Inhibitor has been awarded Build Cert BC1426; DWTA industry standard.

Solid Chemicals

If you are thinking about solid chemistry technology, talking about it to your customers, or want to know more about this new business opportunity, contact us for industry leading pricing, service and products.

FREE App

Our 'WTP Estimations Tool' App calculates chemicals required for steam boilers and cooling towers. Offers fast access to a wealth of information no matter where you are! Available for iPhone and Android smartphones: it's free, it's handy and it's quick to download.

To download your free WTP Estimations Tool visit iPhone app store or Google play for android

Leisure Division Launches New Product

Sanosil

Sanosil products are the only Silver - stabilised hydrogen peroxide to be participating under the BPR. As you can imagine Sanosil have had to invest heavily in getting the appropriate data together to apply for this registration - but it does mean all WTP customers have access to a product that ticks all the boxes!!

The one and only EU Biocide Article 95 compliant Hydrogen Peroxide / Silver based Disinfectants

Christmas 2016 Delivery Schedule

For deliveries prior to 23rd December please forward orders by 12 noon on **Friday 16th December 2016**

WTP Test Kits - Latest developments

HSG 274 Part 1 Advanced Test Kit

Ideal for monitoring of cooling water to ensure correct water conditions have been achieved for lowering Legionella risk and compliance.

Copper Test Kit

For the determination of copper via drop test method. Kit includes all the equipment and reagents required to measure copper within a range 0-2ppm for approximately 150-200 tests.

Quat Test Kit

Designed for the determination of quaternary ammonium compounds via drop test method within a range of 0-1000ppm. For specific WTP quaternary based products: WTP C50, C52, C54 and C58. Each kit will carry our approximately 150-200 tests.

PrimeLab adds WTP TraceR Parameter

The PrimeLab photometer with TraceR parameter allows Water Treatment Products customers and users of PrimeLab to easily and accurately test for reserve of all WTP products that include TraceR additives.

This includes:

- TraceR Biocides
- TraceR Inhibitors
- TraceR Cleaning products

Utilising the TraceR adapter in conjunction with the Bluetooth friendly PrimeLab Photometer with TraceR parameter provides an instant on-site test method that accurately measures tracer product and verifies fully circulated liquid accurately. The immediate electronic results from the Bluetooth friendly PrimeLab TraceR are transferred to either laptop/PC or android mobile phone. The data can then be formatted into reports or forwarded to clients, consultants and onsite engineers to verify and accredit the results; with data logged for audit trail purposes.

Difficulty Calculating System Volumes?

Use TraceR to quickly and accurately calculate system volumes. WTP supply TraceR system volume calculation using TraceR liquid and the PrimeLab TraceR function.

TraceR solutions supplied in 1L containers. TraceR is unique to PrimeLab and WTP Ltd; for more details or to arrange a demonstration please contact: sales@watertreatmentproducts.co.uk

BSRIA BG50 Engineers Test Kit

On-site Testing

- Covers testing as stated in BG50
- Full range of testing in one easy to carry case
- User friendly
- Full instructions
- Liquid, Powder and Tablet reagents

NEW

Isothiazolone test now available

- Easy to use
- Cost effective on-site biocide test
- Accurate Photometric analysis using PrimeLab
- Closed system biocide verification
- Cooling tower biocide dosing
- Results recorded with date/time for future reference
- Developed and manufactured at WTP laboratories
- Only available from Water Treatment Products
